

Kitty Fairy Flower Crown

Instructions:

1. Cut along the dotted lines to separate the crown front and the two back strips.
2. Add color and decoration to the crown pieces using coloring utensils and/or any craft embellishments of your choice (e.g., sequins, dried flowers, foam shapes).
3. Attach one side of one back strip to each edge of the crown front, with the back strips positioned underneath the crown front so their edges aren't visible.
4. Fit the crown around the participant's head, centering it on their forehead, wrapping the strips around the back of their head, and securing them together for a custom fit. Cut off any excess paper.
